

# Skoodos: Simplifying the School Search Process in India

[Find Best School near me](#) - Skoodos is an AI-powered school search aggregator in India that helps parents find the best private schools for their children based on their preferences and criteria. The platform currently has information about 14,000 private schools in India and allows parents to compare schools based on over 40 criteria, such as school ranking, rating, education board, and infrastructure. Skoodos also integrates user ratings and provides verified information about the schools. The platform is designed to streamline the school search process for parents and give schools an equal chance to showcase their strengths. Skoodos was founded by Dr. Siya Seth, who saw a need for a platform that could help parents find the right school for their children.

Skoodos has partnered with private schools from all boards and curricula (state, CBSE, ICSE, IB, CISCE, NIOS, CIE, matriculation, Montessori) and classes (preschool to Grade 12) Government-aided schools are not present on the platform at present, as that requires permission and authorisation from government bodies at various levels for the verification process.
