

Waste Removal in Toronto: How Soon Does Waste Decompose?

To understand the value of waste removal in Toronto, it would help to know the time it takes for different types of waste to decompose. If you have junk lying around, you can hire a company to haul everything away. The last thing you want is to let piled up junk rot to the point that it smells, creates a health risk, or damages the environment.

With the services of a reputable [waste removal company](#), a team of experts will have junk removed in no time. If you have some questionable items that might contain toxins, it is essential that you use a waste removal service qualified for the job. Although things like old tires, furniture, and appliances do not decompose, others eventually do.

- **Plastics** – Plastic material accounts for a tremendous amount of land and water pollution. Plastic bags used for groceries take anywhere from 10 to 1,000 years to decompose. Plastic water, juice, and energy drink bottles take roughly 450 years. When using the right waste removal service, plastic junk goes to a recycling center as opposed to a landfill.
- **Disposable Baby Diapers** – According to recent statistics, approximately 18 billion disposable diapers get tossed out each year just in the US. When dumped in landfills, they take 250 and 500 years to decompose.
- **Aluminum Cans** – Instead of waiting 80 to 200 years for aluminum cans to decompose, a professional waste removal company can drop them off for recycling.

Business Address: 246 Pacific Ave, Toronto, ON M6P 2P5

Phone No. – [416-743-6348](tel:416-743-6348) Site - www.ridofittoronto.com Email ID – info@ridofittoronto.com

- **Paper** – Although paper waste only takes two to six weeks to decompose, it is the number one element in US landfills. However, it too is recyclable.
- **Glass** – Experts agree that glass does not decompose. However, because one of its main components is sand, the right junk removal companies will take any on your property to a recycling site.
- **Miscellaneous Waste** – You may have multiple other items on your property that take a long time to decompose. For instance, it can take cigarette butts take up to 12 years, untreated lumber roughly 15 years, Styrofoam cups up to 50 years, plywood between one and three years, painted boards about 13 years, and batteries up to 100 years to decompose.

Regardless of the type or volume of junk that you want to get hauled away, we can help. At [1-800 RID-OF-IT](https://www.ridofittoronto.com), we have the experience and expertise required. Contact us today to get started on cleaning up waste at your home or business.
